**2:00-4:00 pm Tours (choose 1):**

- **Electric Bus Maintenance Facility** – Park City was at the forefront of electric transit bus technology. The Tour will include a “back-of-the-house” look at the evolving technology and equipment, including tools, computers, and the ability to ride and learn more about our fleet of electric busses.  
*Troy Dayley, Public Works Manager & Barry Potter, Fleet Manager*
- **Accessory Dwelling Units in Action** – Park City developed an in-town affordable housing development that includes accessory dwelling units (ADU’s) and common parking, plazas, and storage areas. Learn more about how the development allows affordable homeowners to augment their monthly expenses by providing housing for the seasonal workforce.  
*Jason Glidden, Affordable Housing Manager*
- **Water Treatment Facility** – Park City is constructing a \$100M+ water treatment facility in town to provide clean drinking water for decades to come. The majority of Park City’s water comes from two old silver mine tunnels that extend miles into our mountains. The tour will include the construction site and a tour inside the first several hundred feet of the mine tunnel (wear hearty shoes!).  
*Clint McAfee, Public Utilities Director & Roger McClain Public Utilities Engineering Manager*
